VETERINARY DIAGNOSTIC FILES

**Description:** Used to document veterinary tests and to establish diagnostic summaries for proposed treatment and internal research. These files consist of pathology submission forms, routine specimen submission forms, poultry specimen submission forms, and Department of Natural Resources research request forms. Information includes client information, animal identification and background information, types of samples submitted, tests requested, and billing information. These records also contain accession summary and comment reports. Information in these reports includes accession number, report date, name of referring veterinarian, animal identification, and pathology findings.

**Retention:** Diagnostic submission forms- 3 years; destroy. Accession Summary and Comments Reports- 3 years and until no longer needed for reference; destroy.

BLUEPRINTS

**Description:** This series consists of blueprints of various facilities used by the Dairy Science Department. These blueprints include the Dairy Center, Rural Housing Project, and research buildings. These drawings detail the layout, electrical system, drainage system, structural layouts, and other specifications.

**Retention:** Retain in department until no longer needed for reference. University Archives: Selection of needed documentation; permanent.

Schedule approved 12/21/90
